

tesseract\_environment  
/include/tesseract\_environment  
/environment\_cache.h

```
graph BT; A["tesseract_environment  
/src/environment_cache.cpp"] --> C["tesseract_environment  
/include/tesseract_environment  
/environment_cache.h"]; B["tesseract_environment  
/test/tesseract_environment  
_cache_unit.cpp"] --> C;
```

The diagram illustrates a dependency structure where two source files, `environment_cache.cpp` and `_cache_unit.cpp`, both include the header file `environment_cache.h`. The header file is located in the `/include/tesseract_environment` directory, while the source files are in `/src` and `/test/tesseract_environment` respectively. The header file box is shaded gray, and the source file boxes are white. Blue arrows point from the source files to the header file.

tesseract\_environment  
/src/environment\_cache.cpp

tesseract\_environment  
/test/tesseract\_environment  
\_cache\_unit.cpp
